EXAMINER

ABDULSELAM, ABBAS I

ART UNIT PAPER NUMBER

2674

DATE MAILED: 09/08/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/855,761

Applicant(s)

PO-SHENG SHIH

Examiner

Abbas I Abdulsalam

Art Unit

2674

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see # 11, filed 02/02/04 with respect to the rejection(s) of claim(s) 1-20 under U.S.C. 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Wasilewski et al. (USPN 5341425)

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kotani et al. (USPN 6101536) in view of Wasilewski et al. (USPN 5341425).

Regarding claims 1, 15 and 18, Kotani teaches the image transmitting terminal used as image signal generating device which serves to receive a video camera control signal to control the camera and to execute the signal for transmission to a network through which transmission of an image to a remote monitoring takes place (col. 3, lines 9-18 and 63-66). Specifically, Kotani discloses the use of network (100) with respect to the monitoring terminal (60) transmitting

Art Unit: 2674

control signals to the image-transmitting terminal (20). Kotani also teaches the monitoring terminal and transmitting terminal contain a software (410) and multiple softwares respectively (col. 4, lines 1-5, 32-36, Fig 1 & Fig 2). Kotani further discloses the image receiving software (412) for displaying the image data transmitted in a packet format from the image transmitting terminal, and a map management software (413) having graphic user interface (col. 4, lines 32-45 and Fig 2). Kotani teaches that the image transmission is made by a request from the image receiving software (412) to the image transmitting software (422), which in turn transmits the requested data (col. 6, lines 7-14). In addition Kotani teaches the monitoring terminal (60) with respect to memory (124, 125 126) as well as various method of storing the data (col. 15, lines 9-19 & Fig 1). However, Kotani does not disclose the user input being directly at the transmitting terminals. Wasilewski on the other hand teaches transmission sites (22, 24, 28) at each of which is provided with own broadcast key, and a common system key. For example at transmission site (22), the system key (40) and unique broadcast key (42) are convolved in a predetermined manner to generate a unique data encryption key for that transmission site (see the abstract).

Therefore, it would have been obvious to one having skill in the art at the time the invention was made to modify Kotani's system of image transmission to include Wasilewski's encrypted keys at transmission site. One would have been motivated in view of the suggestion in Wasilewski encrypted keys at the transmission site can be used as a user input at the transmitting site. The use of encrypted keys helps function data transmission system as taught by Wasilewski et al.

In addition, with respect to claims 2, those skilled in the art would have ascertained that securely entering encryption key data from a keyboard is well known.

Art Unit: 2674

Regarding claims 3, 6 and 8, Kotani teaches a network (100) along with image transmitting terminal (20). See Fig. 1.

Regarding claims 4, 16 and 19, Kotani teaches receiving an image from the remote image transmitting terminal 20 through the network (100). It would have been obvious that the communication network could be the Internet.

Regarding claims 5 and 7, Kotani teaches transmitting a video camera control code corresponding to a control instruction for the video camera entered by the operator from the keyboard 130 or the mouse 128 to the image-transmitting terminal.

Regarding claims 9 and 11, Kotani teaches the use of bus (39) as shown in Fig. 1

Regarding claim 10, Kotani teaches the use and method of storing in a memory medium including optical disk, and non-volatile memory card. See col. 15, lines 9-18. It would have been obvious that the use of optical disk can be functionally equivalent to a computer readable card such as PCMCIA.

Regarding claim 12, Kotani teaches the state of the display when grouping of icons is displayed as shown in Fig 13.

Regarding claims 13-14, Kotani the camera control panel (640) in conjunction with the image receiving software (412) receiving the data of a captured frame in the form of divided packets See col. 6, lines 1-14 and Fig 8. It would have been obvious the camera along with image receiving software involves processing with respect photographing.

Regarding claims 17 and 20, Saxena teaches an integrated communication center user interface with extended message panel including the use of option buttons such as dial (432) and quick fax (436). See Fig. 5.

Art Unit: 2674

3. Any inquiry concerning this communication or earlier communication from the examiner should be directed to **Abbas Abdulsalam** whose telephone number is **(703) 305-8591**. The examiner can normally be reached on Monday through Friday (9:00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, **Richard Hjerpe**, can be reached at **(703) 305-4709**.

Any response to this action should be mailed to:

Commissioner of patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872-9314

Hand delivered responses should be brought to Crystal Park II, Crystal Drive, Arlington, VA, Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology center 2600 customer Service office whose telephone number is (703) 306-0377.
